

Administrators Report 7/25/23

Finished up mapping for water and wastewater lines running under US 52 for 143 Engineers regarding the Round-About Project.

Stormwater issues over the last (2) storm events

1. Old US 52 by River Valley Blvd.
2. Around 706 & 821 Greenmound
3. Columbia & Quarry
4. Caroline and Plenty
5. Front St by Plum Street Park (Dobbins)
6. 202 Compass

Reached out for pricing to camera the mention areas to determine the possible issue for the slow drainage estimated cost for one day services is around \$2850.

Level 2 EVCharging Grant from the Ohio EPA for \$15K, goes back to June 2021.
I have a quote from EV United with items listed below

Dual Charging Unit	\$7703
5 yr. service updates & support	\$2210
5 yr. warranty	<u>\$2495</u>
Total	\$12408

Installation	\$23176
--------------	---------

Total all	\$35584
Grant Award	\$15000

Village out of pocket	\$20,584
-----------------------	----------

The above does not include site work est. \$15K +/-

Working with Emily Lescott OEPA, and Environment Engineering for New Richmond's WRSLA PFAS evaluation treatment planning project. The village will be receiving \$50K in principal forgiveness, so the only out of pocket cost is the application fee of \$175. I don't believe we need a resolution

Same topic Norm and myself had a go-to meeting with Jonathan Deters and Brando Taylor on information they requested for the complaint filled by the Village. Should have the information to them by the end of the week.
